
Quality Policy

S-Cube Technologies provides technology and regulatory solutions for the medical-device sector. We are committed to delivering reliable, compliant and customer-focused products and services that support customers in bringing safe and effective medical-device solutions to market.

To fulfil this commitment, S-Cube Technologies will :

- Maintain a Quality Management System that is appropriate to our purpose and context and supports our strategic direction.
- Understand and meet applicable customer, statutory, regulatory, contractual and other requirements relevant to our products, services and Quality Management System.
- Establish and review measurable quality objectives at relevant functions and levels, supported by clear responsibilities and appropriate resources.
- Strengthen customer satisfaction by delivering dependable solutions, responsive support and an effective customer experience.
- Select, monitor and collaborate with suppliers and external providers using criteria proportionate to their effect on the quality of our products and services.
- Promote competence, accountability, risk-based thinking and employee involvement so that everyone understands how their work contributes to quality.
- Consider whether climate change is a relevant issue when evaluating the context, risks and opportunities affecting the Quality Management System.
- Careful selection of suppliers for the software design and development following strict criteria to provide the best quality of products and services
- Commitment to increase the quality of products by carrying out plans in order to reduce the number of product defects and complaints to exceed customers' expectations
- Continually improve the suitability, adequacy and effectiveness of the Quality Management System and the performance of our products, services and processes.

Framework for objectives: This policy provides the framework for establishing and reviewing quality objectives, with supporting arrangements defined in the Quality Manual and relevant QMS processes.

Communication and availability: The CEO shall ensure that this policy is maintained as documented information; communicated, understood and applied throughout the organisation; and made available to relevant interested parties, as appropriate.
